Experience

Senior Platform Engineer

MuleSoft

Apr 2019 - Feb 2021 (1 year 11 months)

Built out new "Core Platform as a Service" (Core PaaS) which enabled rapid continuous deployments of internal services across regions. I was also part of the team building a FedRAMP-authorized deployment of our platform.

I proposed and launched an internal newsletter for my team. Soon after joining, I had noticed that we (the platform team) didn't have a clear communication channel to the other service teams. Confusion and miscommunication, yada yada yada... But within a year, service teams had come to take our monthly newsletter for granted, which was the goal.

Foundation Engineer

EvengX

Nov 2017 - Sep 2018 (11 months)

Acquired TrustPipe. Took the opportunity to refine our continuous delivery and release infrastructure. I saw my teammates as the customers of our continuous delivery product, and relished their feedback and the opportunity to help them work better.

Software Engineer

TrustPipe, LLC

Oct 2015 - Oct 2017 (2 years 1 month)

I joined this startup when the team was just a small handful of engineers. I started as the primary engineer for the Windows agent and built out most of its core functionality. As we grew, I got to take on responsibilities across our tech stack: backend, logging, data, and especially the CI/CD infrastructure.

Member Of Technical Staff

Acer

Feb 2013 - Oct 2015 (2 years 9 months)

Acer BYOC (Bring Your Own Cloud): cloud services SDK tailored for IoT use

Wrote IP camera reference app, using a Raspberry Pi as the camera hardware and an Android app as the client. Implemented data collection API in the SDK and wrote unit test suite. Built and maintained onsite demo lab and AWS environment for partner demos and development.

Assistant Instructor

Galileo Learning

Jun 2012 - Aug 2012 (3 months)

Brought on for the camp's first year, so energy, enthusiasm, and flexibility required to ensure the camp's success. Camp was located in a functioning public museum, so I worked around a variety of space constraints to develop a rewarding camp experience. With the new space came many new camp classes, so those curricula were also untested. I worked with instructors to adapt and change activities on a weekly basis to tailor to new group of campers. My energy and improvisational background allowed

Ambassador

University of San Francisco

Aug 2010 - May 2012 (1 year 10 months)

I led prospective and admitted students on campus-wide tours, conveying the intellectual mission and culture of the university.

Intern

The Second City

Jun 2011 - Aug 2011 (3 months)

I was able to put my passion for improvisation to direct use. I worked with a team of producers to ensure the nightly shows were ready. This involved treasure hunts, manual labor, and in-depth research on audience members. I also was in charge of researching the college comedy touring market to allow the Second City to better connect with and gain fans. I learned the day to day required to both run a top comedy theater and produce good comedy.

Secretary to the Assistant Director

University of San Francisco

Aug 2009 - May 2011 (1 year 10 months)

I set up and maintained a web presence (Twitter, Facebook, blog), performed general office duties, and represented the Institute at open houses through talks and one on one conversations.

Cast Member

Disney Store

Jun 2010 - Aug 2010 (3 months)

Super fun, a great environment to learn retail. As a cast member, I imbued delight and magic in every guest interaction.

Deckhand

Chicago's First Lady Cruises

Jun 2008 - Aug 2008 (3 months)

I was responsible for passenger safety for the duration of the cruise, including ensuring the ship safely casted onto and off from the dock, emergency procedure, etc. Sometimes during tours, rusty chunks of metal would fall off the underside of the many trunnion bascule bridges that cross the Chicago River, and we would do our best to discreetly sweep those away.

The First Lady is the only cruise line that carries the Chicago Architecture Foundation River Tour, which I highly recommend. I learned so much from listening to the docents I started giving informal "Batman/Dark Knight" tours of Chicago.

Education

University of San Francisco

Bachelor's Degree, Computer Science

2008 - 2012

Oak Park and River Forest High School

2004 - 2008
